SecureCheck 9

SecureCheck 9 Features

Windows 10 Compatibility

SecureCheck 9 is a perfect 10 - fully compatible with Windows 10 operating system, whether using Edge, IE, or Chrome.

Security Permissions

Assign administrative and printing permissions based on user role and responsibilities. Double login requirements are also assignable.

Manual Checks

Improved manual check printing capabilities. Securely print manual checks from your desktop or the cloud.

Enhanced Event Log and Reporting

Tracks all user and system activity; successful or failed user login, modified permissions, updated check outlines, and check print activity.

Integrated Positive Pay

Award-winning SecurePay positive pay file creation is integrated and included as a standard SC9 and SCC9 feature.

Signatures and Signature Logic

You have the ability to assign the number of signatures required based on check amount. In the cloud, signatures are live from any touchscreen device.

Instant Event Notifications

Keep specified recipients informed with email notifications of all important check printing activity. With SecureCheck Cloud 9, notifications are available by email or text.

Approval Workflow

Replace inefficient, vulnerable, manual processes with reliable, secure approval workflow automation. Text and email notifications mean that you do not need to remember to approve payments.

Post Check Run Preview

Easily review all details of your last check run.

Enhanced Sorting

Sort payments based on check number, payee, date, amount, file name, or overlay.

Multiple Checking Accounts

Easily create and modify form overlays for multiple checking accounts with the ability to place up to 12 objects and 7 graphics for each form.

Account & Printer Selection

Print mixed-account check runs with auto-selection of correct check overlay and printer.

SecureCheck Cloud 9 Accessibility

Pay Anywhere, Anytime

Authorize, sign, send, and manage payments from mobile phones, tablets, and pads.

Checks and Electronic Payments

Paper check printing, electronic virtual checks, and ACH payments... it's your choice. Real ACH: The key advantage is that we process the ACH delivery to the banking system. No need for you to format and send files to your bank.

Mobile Efficiency

Use your mobile phone, tablet, or pad to monitor, approve, and sign payments. Eliminates the need to be in the office to sign and approve paper checks. Anytime, anywhere access means you manage and control the release of checks and payments from home, from the golf course, or even on vacation.

Compatible with SecureCheck

No time-consuming, expensive integration needed. If you can print checks today using SecureCheck, then SCC9 can easily bring ACH, mobile, and Cloud capabilities to your check printing and payment processes.

Remote Check Printing

Satellite offices can upload, approve, and print checks using a SecureCheck printing client and compatible printer. With Cloud accessibility, you can enable Payees to print your authorized checks at their site for instant payment.
