SecureCheck 9

SecureCheck 9 Features

Windows 10 Compatibility

Secure 9 is a perfect 10—fully compatible with Windows 10 operating system.

Security Permissions

Assign administrative and printing permissions based on user role and responsibilities. Double login requirements are also assignable.

Manual Checks

Improved manual check printing capabilities. Securely print manual checks from your desktop.

Enhanced Event Log and Reporting

Tracks all user and system activity; successful or failed user login, modified permissions, updated check outlines, and check print activity.

Integrated Positive Pay

Easily integrate and automate Positive Pay files.

Signatures and Signature Logic

You have the ability to assign the number of signatures required based on check amount.

Instant Event Notifications

Keep specified recipients informed with email notifications of all important check printing activity.

Approval Workflow

Replace inefficient, vulnerable, manual processes with reliable, secure approval workflow automation. Text and email notifications mean that you do not need to remember to approve payments.

Post Check Run Preview

Easily review all details of your last check run.

Enhanced Sorting

Sort payments based on check number, payee, date, amount, file name, or overlay.

Multiple Checking Accounts

Easily create and modify form overlays for multiple checking accounts with the ability to place up to 12 objects and 7 graphics for each form.

Account & Printer Selection

Print mixed-account check runs with auto-selection of correct check overlay and printer.

Images: Mobile Deposit-Friendly

SecureCheck Images are Suitable for Mobile Capture and Deposit.
